

LOUVRE WINDOW

The CityView™ Louvre Window is a modern system that provides exceptional controlled ventilation. Enjoy natural light with convenient weather control and the freedom to let in the amount of fresh air you prefer. It is a proven performer, developed to withstand harsh environments and achieve performance ratings that meet the stringent requirements of Australian standards for windows.

A choice of glass, timber or powdercoated aluminium blades are available. The louvre blades are secured by unique UV stabilised injection-moulded clips that provide a weathertight seal and are corrosion-free. CityView™ louvres can be fitted with an integrated insect screen that does not interfere with the operation of the louvre blades. Some options include a barrier bar system, key locks and motorisation.
